Scrum: 

Unity: 

C#: 

## LANGUAGES

Dutch: 

English: 

German: 

## INTERESTS

 Music

 Python (machine learning)

 Mathematics

 Problem solving

 Archery

## INTERNSHIP GOAL

My goal during this internship is to work on an exciting and challenging project within embedded software. I would really like to dive into a project which requires a lot of determination from me. I would like to gain real-life experiences, namely working in a team and finding out the challenges of a working environment.

It would be really satisfying to solve a real world problem for the company I work for, furthermore it would be very enjoyable for me to learn new techniques and technologies within the field.

## EDUCATION

### ICT and Technology

02-2018 until present

Fontys University of applied science

I have finished my foundation course.

As specialization i have done a number of game design courses.

During the minor i have followed a structured embedded systems course.

---
